ALGORITHM

Step 1: Start the program.

Step 2: Create a node containing Order ID, Customer Name, Food Name, and pointers prev and next.

Step 3: Initialize HEAD = NULL.

Step 4: Display the menu:

Add New Order

Display Orders

Complete Order

Exit

Step 5: Read the user's choice.

Step 6: Perform the selected operation:

Add New Order: Read order details, create a new node, and insert it at the end of the list.

Display Orders: Traverse the list from the first node to the last node and display all orders.

Complete Order: Delete the first node and update HEAD and the new first node's prev pointer.

Exit: Terminate the program.

Step 7: Repeat the menu until the user selects Exit.

Step 8: Stop the program.
